## Basic household contents

Basic household contents include furnishings (furniture, curtains, etc.), home electronics (TV, computer, digital camera), appliances, dishes, linen, clothing, shoes, food supplies, mopeds, bikes for ordinary use, etc. How much are your household contents worth? The table on the right-hand side serves as a reference and is based on average estimates. We recommend that those with a higher living standard compile a detailed inventory of their items. To assess your basic household contents, match the number of rooms with the number of household members. Children below the age of 14 count as half a person.  
 All amounts are in CHF.
