Sunet*plus*

# Managing your absences professionally /

Sunet*plus* software, which is free of charge, is a part of the comprehensive services AXA offers in the field of corporate health management. You too can learn how to save costs and analyze data with the claims notification and absence management application, one of the most efficient tools on the market today.

| Absences |
| :---: |
| Illness/accident/other |

| Entering master data |
| :---: |
| Data on the absence/policy<br>Data on employees/company |

- Straightforward data import
- Simple manual data entry
- Efficient data administration

| Transferring claims notifications |
| :---: |
| AXA/other insurer<br>with a Sunet*plus* license |

- Secure data transfer
- Reliable system for handling access rights
- Seamless encryption

| Analysis |
| :---: |
| Analyses/statistics/graphics |

- Analyses that are easy to understand
- Creditable basis for taking further steps
- Efficient means of prevention

**Cost savings through professional claims and absence management**

## Practical and reliable

Sunet*plus* prides itself on being very user-friendly and highly reliable. Unlike a pure internet solution, all data and analyses remain with the company when you use Sunet*plus*. And data transfer is subject to the most stringent security regulations. In order to ensure high data quality, all data is subjected to a systematic test.

## Properties and possibilities

Entering absences and claims notifications systematically will make it easier for you to process claims because the data is transferred electronically to AXA's system. Furthermore, the application offers interesting possibilities for analyzing data, together with graphs and statistics that are easy to understand.

## Other advantages

- Open interface to external HR systems allows you to import all employee data regularly
- Besides tracking absences from an accident or illness, you can also administer and analyze those from vacations, training seminars and military service
- Reliable access system for maximum data security
- Analytical capabilities that reflect your operational structure
- Highly encrypted treatment of sensitive information as well as encrypted (SSL) data transfer
- Integration of supplementary forms (e.g. doctors' notes)
- Comprehensive support and possibilities for employee training courses
- Updates readily available over the internet
- Can be adjusted and expanded to meet your company's requirements
- Sunet*plus* is available in German, French, Italian and English

AXA winterthur

## Powerful expanded functions

Sunet*plus* includes a wide range of expanded functionalities, such as risk analyses as well detailed catalogs of measures for handling absences that already occurred, and suggestions for prevention.

## Further development

The deep expertise of licensees in the field of claims handling and absence management is incorporated continuously into the updates of Sunet*plus*. This allows us to guarantee the continued further development of the application with many additional functions. Using Sunet*plus* will help ensure that your company remains innovative in the future.

## Installation and updates

You can install the application and search for updates by visiting www.bbtsoftware.ch.

## System requirements for Sunet*plus*

- Windows XP SP3 or higher
- .NET Framework 3.5 SP1
- Internet Explorer 5.0 or higher (128 bit encryption pack)
- Excel 2002 or higher (for exporting statistics)
- XGA resolution (1024 x 768) and min. 16 bit color quality

## Support

We offer efficient support services during business hours, also after the installation. And if you like, we can arrange for a training course of your employees, also at your location.
